PRESTO®

Indoor Electric Smoker

For delicious recipes, visit
www.GoPresto.com

- Works indoors! Quickly and easily smokes food right on your kitchen counter.
- Infuses your favorite foods with authentic smokehouse flavor.
- Digital touchpad with settings for cold smoke, hot smoke, or a combination of both.

AMERICA'S FIVE-STAR BRAND

Smokes meats, poultry, seafood, vegetables, cheese... even eggs and pizza!

Tempered glass cover with gasket seals the smoker to minimize odor, allowing it to be used indoors.

Simply add a small amount of your favorite wood chips to the stainless steel charring cup.

Three-tiered rack with handles for easy placement and removal of food. Handles fold down for compact storage.

- **Uses readily available wood chips** including hickory, apple, pecan, oak, maple, bourbon, and mesquite.
- **Hot, cold, and combo smoking modes.** Hot smoke is ideal for beef, pork, chicken, and seafood; cold smoke is best for cheese and vegetables and does not cook the food; combo smoke infuses maximum smoky flavor and then cooks the food—perfect for large cuts of meat.
- **Digital touchpad with timer** sets smoking modes and timer counts down the remaining smoking time. Alarm signals when time is up and automatically switches to keep warm.

ETL LISTED US Intertek
